

# Table of contents:

## Executive Summary

## Definitions

## Part 1: Electrolysers manufacturing capacity (p.8)

### 1.1 Global production (p.8)

1. Yearly manufacturing capacity in GW
2. Cumulated manufacturing capacity in GW
3. Global hydrogen production capacity in tonnes/year
4. Manufacturing capacity by company
5. Yearly manufacturing capacity in GW by technology
6. Cumulated manufacturing capacity in GW by technology
7. Comparison with IEA Net Zero Scenario

### 1.2 Regional production (p.18)

1. Yearly manufacturing capacity by region
2. Cumulated manufacturing capacity by region
3. Identification of electrolyser manufacturing plants by region

### 1.3 Cost analysis based on manufacturers data (p.24)

1. Hydrogen and electrolysers cost targets from companies
2. Hydrogen and electrolysers cost targets from IRENA (2021)
3. Electrolysers factories cost targets

## Part 2: Major electrolysers manufacturers (p.28)

### 2.1 First-tier (p.28)

1. LONGi
2. John Cockerill
3. Sungrow Hydrogen
4. Thyssenkrupp Nucera
5. Peric
6. SANY Hydrogen

### 2.2 Second-tier (p.42)

1. Cummins Accelera
2. Tianjin Mainland Hydrogen Equipment (THE)
3. Nel
4. Siemens Energy
5. Ohmium
6. Plug Power

### 2.3 Third-tier (p.56)

Over 170 companies manufacturing electrolyser systems

## Part 3: Are global ambitions for electrolyser installations realistic ? (p.63)

### Electrolysis production vs. National/Regional ambitions

1. European Union
2. China
3. Other Asian countries
4. North America
